

**MITIGATING EMAIL-BASED THREATS**

Millions of virus, spyware and malware infected emails propagate over the internet each day and each of your users may get dozens, if not hundreds, of potentially dangerous emails every day. **What are you doing to make sure your IMail server and users are safe from harm?**

Simply relying on server and client-side antivirus and anti-spyware is no longer an option. Your users are vulnerable and the sooner you can mitigate the threats, the better. The answer is Declude and Allenfield Solutions knows how best to integrate this powerful protection into your existing Windows-based IMail server installations. Utilizing dozens of reliable and real-time threat analysis tests, Declude removes threats before they ever reach your users.

**Call: (800) 641-6322**

**MAXIMUM ROI, MINIMUM TCO**
